

NWAEZE JASON

Software Engineer
Backend Developer
Developer

PROFILE

I am a driven software engineering student with strong leadership and technical skills. I specialize in full-stack and mobile development, building responsive and performant applications using technologies like React, Next.js, FastAPI, and React Native. Alongside development, I have a strong foundation in Data Analysis and Machine Learning with Python, leveraging libraries such as NumPy, Pandas, Matplotlib, and Seaborn to derive insights and build predictive models. A quick learner who thrives on feedback, I'm constantly improving, adapting to new technologies, and tackling complex challenges with creativity and precision.

EXPERIENCE

Toraaah

2025-2025

Developed and optimized Toraaah web and mobile apps, migrating React functionalities server-side to improve performance. Implemented and refined video playback for seamless streaming. Ensured cross-platform consistency and enhanced user experience across web and mobile, using React, Next.js, Expo, and React Native.

9mobile

2022-2022

During my IT Support internship at 9Mobile, I gained hands-on experience in diagnosing and repairing computer systems and assembling hardware. I assisted in setting up workstations and troubleshooting hardware/software issues, enhancing technical skills in IT support, problem-solving, and team collaboration.

DreamCode

2019-2021

As Founder and President of DreamCode, I led a 30-member programming club, developed coding lessons in Scratch, HTML, CSS, and JavaScript, and mentored students. I also guided the club to an 8th-place finish in the Genesys Young Innovators Challenge, enhancing my leadership and technical skills.

SKILLS

- Data Analytics with Python
- Backend Development (Fast API, Node Js)
- Database Management
- Mobile Development (React Native)
- Front-End web development (React, Next Js)
- Creative problem solving

EDUCATION

Pan-Atlantic University

2024-2028

B.Sc Software Engineering

Hillrange Secondary School

2018-2024

Science Major
