

Jason Nwaeze

Backend Developer

+234 901 999 9049 | jjaskme77@gmail.com | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Software Engineering student specializing in backend development using Python, FastAPI, and TypeScript. Experienced building REST APIs, authentication systems, and event-driven integrations with databases and third-party APIs. Strong foundation in data analysis and machine learning using NumPy, Pandas, and Matplotlib. Skilled in debugging, API design, and deploying applications with Git and modern cloud tooling.

SKILLS

- Python and FastAPI
- C++ development
- PostgreSQL database management
- Caching strategies
- Data visualization with Matplotlib and Seaborn
- Rust programming
- TypeScript and Next.js
- Microservices architecture
- Data analysis with Numpy and Pandas
- Version control systems

PROJECTS

RIDESHARE — Carpooling s Geospatial Matching App

[View on GitHub](#)

- Built a mobile MVP enabling users to share rides by matching trips with similar routes.
- Implemented JWT authentication, password hashing, dependency injection, and rate limiting.
- Designed geospatial matching with Redis geohash/georadius and Hausdorff-based route similarity.
- Cached routing data and ORS responses to reduce API costs and improve performance.
- Exposed mobile-facing REST endpoints for trip creation, matching, and map visualization.

Tech Stack: Python, FastAPI, React Native, Expo, Postgres SQL, Redis, OpenRouteService

EXPERIENCE

HEAD OF PARTNERSHIPS AND EXTERNAL RELATIONS

November 2025 – Present

Technology Innovation Club

- Led the Partnerships and External Affairs division, successfully securing critical sponsorship funding for large-scale club events and hackathons.
- Managed all corporate relations, overseeing pitch development, negotiation, and fulfillment of sponsorship obligations.
- Orchestrated collaborative events between the club and external tech companies, enhancing member opportunities for networking and career development.

FRONTEND DEVELOPER INTERN

January 2025 – March 2025

Toraaah

- Developed and optimized cross-platform web and mobile features using React, Next.js, Expo, and React Native.
- Migrated key React functionality to server-side execution, improving load performance and responsiveness.
- Implemented and refined video playback pipelines, enhancing buffering stability and user experience.

IT SUPPORT INTERN

July 2022 – August 2022

9mobile

- Diagnosed and repaired computer systems and peripherals as part of the IT Support team.
- Assisted with troubleshooting hardware/software issues, improving system reliability for internal staff.
- Researched solutions for complex technical problems by utilizing online resources and manuals.

EDUCATION

B.SC. IN SOFTWARE ENGINEERING (CANDIDATE)

GPA 4.94

Pan-Atlantic University

Expected December 2028

CERTIFICATIONS

- CS50 by Harvard
- Machine Learning Specialization — Stanford Online (In Progress)
